Bio

I earned my BA in Secondary Education in 1991. For seventeen years I pursued teaching and administrating. Following the birth of my children, I became more interested in health education and transitioned into a job at the Department of Public Health. My responsibilities included creating and presenting curriculums for outreach at pediatric and obstetrics offices. I also participated in breastfeeding research, operating the breastfeeding helpline, and teaching prenatal classes. My desire to use visuals in education prompted me to create the “Lego Stack” which compares breastmilk ingredients to formula ingredients (which is used throughout the World). In 2008, I sat for and passed the IBLCE Exam. Many of my coworkers desired to become Lactation Consultants, so I determined to write a course to prepare them to sit for the exam. Based on my initial pilot program, I wrote the award-winning, Grow Our Own Lactation Consultant/IBCLC Prep Course, which has been used to train hundreds of individuals to become IBCLCs. The program is still being utilized today, more than 10 years after its inception.

I founded Birthing, Bonding and Breastfeeding and the subsidiary organization, 3B Publishing, in 2010, to publish breastfeeding literature and offer unique breastfeeding educational tools. My children’s book, Mommy Feeds Baby/Mama alimenta al Bebe, has sold over 10,000 copies. In 2016, I added to my publications by co-authoring Making Milk, an adult coloring book composed of beautiful illustrations and breastfeeding affirmations. I also invented the Lactation Lanyards™ (teaching aids) which are being used nationally and internationally in hospitals and health clinics to empower moms and educate about colostrum.

Currently, I continue to work part-time for the Department of Public Health, teaching and facilitating a free breastfeeding clinic. I also volunteer as a birth doula and have a private practice as a Lactation Consultant. I am a trainer for the CAPPA CLE™ and Childbirth Educator Programs. I often enjoy traveling the world to share my passion, knowledge and advocacy at perinatal conferences. I live in California with my husband of twenty-four years. We enjoy visits from our three college students when schedules permit.

Employment History

January, 2010 to present
